

Assembly instructions

12' x 12' Mosquito net with sliding rails

B121230-MOS

MEUBLES DE JARDIN
CORRIVEAU
OUTDOOR FURNITURE

Important notice

Please read and follow all safety statements, warnings, assembly instructions, use & care directions before attempting to assemble. Each of the recommendations must be followed to ensure the utmost solidity.

Security Rules

Warning:

Keep flame and heat sources away from the gazebo fabric. The fabric may burn or melt at direct contact or prolonged exposure with a source of heat. The application of any foreign substance to the gazebo fabric may affect the flame retardant properties.

Regulation

It is the responsibility of the consumer being in accordance with city regulation, construction code, zoning or any limitations and obtaining permit prior assembling the gazebo.

Recommendation

- When assembling and using this product, basic safety precautions should always be followed to reduce the risk of personal injury and damage to parts.
- Do not use the gazebo during extreme weather conditions.
- Before beginning assembly of product, make sure all parts are present. Compare parts with package contents list. If any part is missing or damaged, do not attempt to assemble the product.
- Some parts may contain sharp edges. Use of protective gloves is always recommended.
- When installing and assembling your gazebo, it is recommended that 2 or more adults are involved.
- Considering at least 5 hours to complete installation, even well anchored, a gazebo unit that is not finished assembly can get or create damages to nearby environment.
- Verify that all nuts and bolts are tightly secured before and during use period.
- Use proper tools and equipment for a safe and compliant installation. Never climb, sit or stand on structure while assembling.
- Although this gazebo is built for all year round, the snow must be removed from the roof.

- Mosquito net and curtains (optional) must be removed from the unit in freezing period.
- Anchoring bolts or other anchoring devices are not supplied.
- Keep away from any electric installation or transportation device.
- Always recommended to keep assembly manual for further reference.

Care

Avoid using a pressure washer. The use of a mild soap with warm water is the best solution for the frame only. A clear water rinse is necessary then. Never use soap on fabric, this will reduce their durability, consequently their lifespan and general look. The use of a soft brush and warm water are an excellent solution for cleaning the fabric.

Warranty

Covered

We warrant the frame and fabric to be free of manufacturing defects to the original purchaser for one year.

Not covered

This warranty does not cover commercial use, lack or improper care, neglected storage, vandalism, chemical, acts of nature, fire, oxidation, stains, freeze damage, improper packaging for return and unreasonable or abusive use. Normal discoloration and build-up snow damages are not covered either.

Customer service:

Consumer

For each part request, please contact your retailer with a description of the problem, pictures and consumer invoice copy, to ensure the proper information to be proceed.

Seller

In addition to all the information already provided by the consumer, any parts requested must mention the person responsible for the client's file, the retailer name, address, branch if applicable, e-mail address, fax and phone number.
